LIGHT TOUCH & SLIDE FOR YOUR DESIRED SELECTION

Easy to operate and set the slider control of power levels (9 power levels) at desired cooking zones individually. Let your cooking control easily.

FASTER HEATING, TIME-SAVING COOKING

Simply activate **Power Boost** for faster heating on a cooking zone on your induction hob to reduce cooking time.

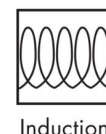

ENSURE AND MAXIMIZE YOUR SAFETY

To maximize safety, every cooking zone is equipped with;

- Automatic shut down: When you forget to switch off a cooking zone or a pot is removed, this induction hob will stop immediately.
- Overheating protection : An equipped overheat sensor can monitor the temperature inside this induction hob. Its heating element of a cooking zone will stop operation automatically when an excessive temperature is monitored.
- Overflow protection : If liquid or some item gets onto the surface by mistake, the hob will also automatically switch off.
- Individual residual heat indicator : Show that individually cooking zone is still hot after finished cooking time.
- Child safety lock : Prevent accidental change in hob setting

APPROPRIATE COOKWARE

- Induction hotplate will function perfectly only if appropriate pot is used
- The appropriate pot is the one which enables induction, for example steel, enamel or steel alloy. Pots made from steel alloy with copper or aluminium bottom, or glass pots are inappropriate.
- When buying cookware, check if it bears the label "allows induction".
